#### **DETAILED ACTION**

### Information Disclosure Statement

1. The references listed in the Information Disclosure Statement submitted 8/2/06 have been considered by the examiner (see attached PTO-1449).

## Claim Rejections - 35 USC § 103

- 2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 3. The factual inquiries set forth in *Graham* v. *John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:
  - 1. Determining the scope and contents of the prior art.
  - 2. Ascertaining the differences between the prior art and the claims at issue.
  - 3. Resolving the level of ordinary skill in the pertinent art.
  - 4. Considering objective evidence present in the application indicating obviousness or nonobviousness.
- 4. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was

Art Unit: 2629

not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Page 3

5. Claims 1-3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tracy (US 2002/0105516 A1) in view of Inoguchi et al (US 6,181,301), both submitted by applicant in an IDS.

Consider claim 1. Tracy teaches a 3D display device using a plurality of display panels (panels 24) arranged in parallel for displaying a 3D image (see ¶0008, 0032-0034 and Figure 3). Tracy does not show using a semi-transparent member to eliminate the reflected images from the front panel.

However, Inoguchi teaches a display device using a plurality of display panels arranged in parallel, wherein a semi-transparent member located between the front and the back panel is used to eliminate the reflected images from the front panel (see column 6 lines 17-35, 45-53, and Figure 1).

Therefore it would have been obvious to one having ordinary skill in the art at the time of the invention to use a semi-transparent member located between the front and the back panel as taught by Inoguchi in the device of Tracy so as to eliminate the reflected images from the front panel as suggested by Inoguchi. Consider claim 2. Inoguchi teaches that the semi-transparent member is built into the electroluminescent panel.

Consider claim 3. Inoguchi teaches using an EL panel.

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Tanada et al (US 6,788,371); Fujii (US 2003/0058390).

#### **CONTACT INFORMATION**

Page 4

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kent Chang whose telephone number is 571-272-7667. The examiner can normally be reached on Monday to Thursday from 9:00 AM to 6:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Sumati Lefkowitz, can be reached at 571-272-3638.

# Any response to this action should be mailed to:

Commissioner of Patents and Trademarks

Washington, D.C. 20231

#### or faxed to:

#### 571-273-8300

Hand-delivered responses should be brought to the Customer Service Window, now located at the Randolph Building, 401 Dulany Street, Alexandria, VA 22314.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should
